

Introducing the F-RIB

The F-RIB's are a completely new generation of multi-purpose boats. The unique way of building a foldable GRP-hull is worldwide patented. This solution provides a completely new way of using a RIB. The solid GRP hull provides the boat with stability and the passengers with a very comfortable ride. The tubes with up to 4 chambers are neatly glued and produce to a extremely good quality. The material is PVC Mirasol 1100g/sqm, a light and UV durable material. The F-RIB's are easy to store and are even lighter, than comparable products.

F-RIBs are suitable for all types of boating and pack down to a size that is easily carried in a car, boat or caravan. Using smaller, lighter engines, the F-RIBs are fast, economical, safe and fun to use with assembly being achievable in under 5 minutes. The F-RIB is a space saver that removes the need for paid storage or a trailer. Each F-RIB comes complete with an accessory bag, benches, 2 oars, an air pump, and a repair kit.

The underwater shape (of the solid glassfibre hull) widens and flattens in the run aft, to make a nice steady planing surface. This is also VERY efficient: F-RIBs are unusually fast compared to other RIBs, size for size and hp for hp.

Here the bow-to-middle joint is fully engaged, and the stern-to-middle joint partially engaged.

Once assembled, the joints are only just visible. This is because the hulls are made in a single mould, segmented off as appropriate, with the joining bulkheads bonded in afterwards.

Getting to this stage probably takes less time than reading the text to explain it. From here on, it's just the same as any other inflatable - just blow it up.

Except of course that there's less air to put in than an air floor dinghy, and no fiddling about with trying to force in finger-trapping floorboards, etc.

STABILITY & PERFORMANCE

The F-RIBS performance in the water is superb due to its light weight and hull shape the F-RIB will out perform every other boat in its class

At the most basic level, it's very reassuring to "stand on something solid". And the F-RIB design (ignoring the fact it folds) seems to be unusually stable. And having a solid hull with a defined underwater shape its not dependent on where people sit.

ASSEMBLING F-RIBs IS EASY AND ONLY TAKES 5 MINUTES

The F-RIB Models

The smallest in the F-RIB range, The F-RIB 275 is only 9 feet in length can be packed away to an impressive 90x85x45cm. The F-RIB 275 can be assembled and inflated in less than 5 minutes with no hassle and extra parts to worry about. These compact inflatable boats have rigid fiberglass hull making them very resistant to wear and tear

The First Foldable RIB with a worldwide patented design. The best solution when storage size matters. The F-RIB 330 weighing only 95pounds/43kg carries up to 4 passengers. The F-RIB can be assembled and inflated in less than 5 minutes with no hassle and extra parts to worry about. Simply fit the two bolts and inflate.

The 360 is easy to row, safe and fast with an engine making them perfect for using it as a leisure boat on all waters. Space-saving in a motorhome, take it with you and use it anywhere in the world and discover the world from the water. Excellent use for rescue organizations and firefighters, that need a boat with small dimensions which is easy to store and handle, but also quickly useable in emergency.

The 375 is the perfect size for medium sized yachts and people who enjoy the outdoor life-style giving them the perfect size RIB which is still very easy to store at the house or onboard. Weighing only 62kg the F-RIB 375 can carry up to 5 passengers. The rigid V-shaped hull makes the F-RIB stable and seaworthy.

The F-RIB 460 is the biggest of our F-RIB range. The design has been inspired by slender sailing boats. A fantastic fit for someone who enjoys spending time on the water, for ocean cruisers and bigger motor boats looking for a smart tender. The Mighty F-RIB 460 can carry 6 passengers whilst only weighing 72kg

Model	Packed Dimensions	Weight	Max People	Overall length	Max loading weight	Rec HP
275	90x85x40cm	36 kg	3	2750mm	300	5 – 10
330	90x90x40cm	43 kg	4	3300mm	450	5 – 10
360	110x90x45cm	48 kg	4	3600mm	700	10 -20
375	110x110x50cm	62 kg	5	3750mm	750	15 – 20
460	140x100x45cm	72 kg	5	4600mm	800	5 -20
460 – Sail	140x100x45cm	80 kg	5	4600mm	800	5 – 20
