

WAVELINE 

WavEco

Premium Inflatable Boats
2017

Our History

During the past 15 years of designing and manufacturing Waveline and WavEco tenders, our focus has remained; to build innovative, contemporary and high quality boats that are easy to use and easy to transport.

Since the first tender was launched into the market, Waveline and WavEco have built a substantial reputation amongst boating enthusiasts for our high quality, stylishly designed craft with first class service and support. From day one, our tenders have been hand built, carefully crafted, and vigorously tested under stringent conditions to guarantee exceptional standards. Our extensive retail network across Europe offers a wealth of expertise, knowledge and experience, wherever and whenever needed.

Waveline SU

The premium Waveline XT range offers the full package of top quality, safety and style - ideal for the watersport enthusiast or for time on the water with family.

Waveline XT

The Waveline SU delivers the expected quality at a lesser weight of a traditional dinghy whilst maintaining the high quality finish expected. These lightweight boats are perfect for when weight matters.

WECFI

The newest addition to the range, for the angler who wants to stay undetected and demands stability and control when landing the big one.

Waveline SP

The Waveline SP is for those who want some serious fun on the water. Pair with an outboard of up to 30HP and figuratively fly with the deep v heel keeping you steady. With optimal performance, we have designed the boat with safety in mind to give you a care free trip by utilising large 48cm tubes.

WavEco ST

WavEco Boats have been developed to offer an economical alternative to the Premium Waveline range. Each WavEco boat is manufactured using durable, yet lightweight 750g 1100 Denier PVC.

WavEco Ultra

A uniquely designed boat from WavEco for those who want to be seen! The WavEco Ultra comes with the quality you have come to expect with some significant upgrades to make your tender experience that little bit special.

WAVELINE Premium Inflatable Boats

MATERIAL

We insist that the fabric used is of top quality 900g 1100 Denier polyester, rather than economy boats which use 750g PVC fabric which are more suitable for lighter use. Our high quality fabric offers increased abrasion resistance, durability, dimensional stability, tensile and tear strength all of which enables us to offer a 4 year limited warranty*.

ATTENTION TO DETAIL

Waveline is suited to all users whether you are a casual user with a family, or someone who likes to put their boat through its paces with some water sports. We have designed our boats to be able to carry bigger outboard engines by including Splashwell flaps to minimise spray and have ensured the boats are hand glued, and double taped seamed, meaning that it is stronger and easier to repair should the boat become punctured or damaged. For safety reasons we ensure all boats are a 3 chamber tube construction.

FEATURES

We understand that the ideal rowing position for each person is completely different. As a result we have developed and integrated an adjustable sliding seat that will allow the tallest or smallest person the most comfortable ride under oar. In addition, to offer greater stability, all slats and seats in the Waveline boats are now aluminium rather than the basic wooden style for comfort of use, and to further increase durability, stability and comfort. Waveline boats now benefit from using Bravo rowlocks and cleat style handles that are more robust, as well as lengthened rope for extra safety. Finally, an improved transom drain has been integrated to replace the traditional bung for ease of use.

Waveline

ROUND TAIL WITH AIRMAT FLOOR

- 900g 1100 denier polyester
- 4 year limited warranty on seams and cloth
- Splashwell flaps
- Aluminium sliding seat
- Cleat style handles
- Transom drain
- 3 chamber construction

- Wide rubbing strake
- Low profile valves
- Stainless steel towing eyes
- Bravo rowlocks
- Lengthened rope for extra safety
- Navy bow & fittings
- Engine bracket

A new product group to the revered Waveline range for those who need a lighter boat and demand a premium, long lasting tender. The Waveline SU delivers the expected quality at half the weight of a traditional dinghy whilst maintaining the high quality finish expected; This is reflected in the 4 year warranty offered on Waveline Boats. We've included a pressure release valve for extra piece of mind on those hot summer days.

Includes: Collapsible oars, repair kit, foot pump, oversized valise
Tube Pressures - Max: 0.25 bar / **Mattress:** 0.6 bar

Waveline

WAVELINE DINGHY WHEELER

Waveline

WAVELINE LAUNCH WHEELS

WLDW/3

By simply attaching these wheels to your tender, you will be easily able to wheel your tender anywhere over hard sand and paved surfaces. You will no longer risk damaging your tender by dragging it or struggle to carry it any longer!

Waveline Tender Wheels are easily installed on wood, fibreglass, or aluminium transoms. The wheel is designed to be permanently fixed to your tender without inhibiting performance. These wheels are made from lightweight, yet strong Mineral Fibre with Industrial Nylon. Resistant to outdoor elements, they will not rust, corrode or deteriorate in the sun or sea. The wheels are also maintenance free and self lubricating. Stainless Steel pins also offer great strength to the wheels.

Max Weight Limit: Must not exceed 260lb - 118kg

WL-3023

These Waveline folding transom wheels are suitable for tender and inflatable boats. The stems and arms are made from stainless steel and the wheels feature rubber tyres.

Max Weight Limit: 112.5kg

Boat Spares & Accessories

A full range available. If you can not find what you need, please send us your requirement and we will endeavour to help.
